## Project Results

- Analysis on the scourge of sexual exploitation of children in travel and tourism and gathering of good practices implemented in EU countries as a result of Directive 2011)93/EU implementation.
- Actors: Institutions, NGOs, trade unions and companies **in a single platform**
- Guidelines and multi-language online training **for those working in tourism.**

The training manual for workers in the tourism sector published by the project may be found at the following address:

<http://safehost.filcams.it/>

and is currently available in the following languages:

## Second phase objectives

**Widen scope of involved sectors**, for example transports, and hence the number of workers that will be able to make use of the toolbox

**Increase the number of languages** in the course for sector workers: in addition to the current ones: English, Italian, Spanish, Hungarian, we would add French, German, Portuguese and a Nordic language;

**Phase 2** of the project, hoping it will receive funding from the European Commission will be long. To connect the two projects and assure continuity, Filcams has prepared a **campaign for the promotion of a multi-language course for tourism workers**, in particular for those employed in riskier destinations.

It should be highlighted in particular that we hope Portuguese will be among the languages, considering the **Rio de Janeiro Olympic Games: 5 – 21 August 2016**.

Great **sports events** are one of the riskiest situations in terms of sexual exploitation of children.

The **objective of the “campaign”** is to raise awareness among workers about this occurrence and to give them specific tools for training.

The chosen message is a symbol in the sector: the reception bell in hotels, that may also represent a sign of “alarm”.

The tools are mainly digital, internet sites reachable through a QR code, but also paper: leaflets-posters
